8.2. Exposure controls	
Materials for protective clothing	: No special required clothing
Hand protection	<ul> <li>In case of repeated or prolonged contact wear gloves.</li> <li>Hand protection: The glove material has to be impermeable and resistant to the product/the substance/the preparation. When choosing the glove material, take account of the permeation times, the degree of permeability and the breakdown rate.</li> <li>Glove material: Choosing a suitable glove is not just about the material, other quality features also come into play and these differ from manufacturer to manufacturer. Given the product is composed from several substances, the durability of the glove material cannot be calculated in advance and therefore it has to be tested before use. Always seek advice from the manufacturer of the gloves.</li> <li>Hygiene: Contaminated gloves should be replaced. Personal hygiene is an essential condition to ensure proper care of the hands. Gloves should only be worn when hands are clean. Hands should be thoroughly washed and dried after having worn gloves.</li> <li>Permeation time of the glove material: The manufacturer of the glove can inform you of the exact permeation time; take account of this. According to DIN EN 374, when there is hand contact with the product and that contact was for a period of 15 minutes, then the gloves of the following material offer sufficient protection.</li> <li>Butyl rubber (thickness &gt; 0.5 mm)</li> <li>Nitril rubber (thickness &gt; 0.5 mm)</li> <li>Polychloroprene rubber (thickness &gt; 0.4 mm)</li> <li>Natural rubber (thickness &gt; 0.5 mm)</li> <li>For continuous contact, we recommend gloves with a breakthrough time of at least 240 minutes, where preference lies with a breakthrough time of more than 480 minutes.</li> <li>Protection against splashes: The same gloves used for long term contact should be worn for short term contact or protection against splashes. A shorter breakthrough time can be acceptable when it is just used for a timely replacement.</li> </ul>
Eye protection	: In case of repeated or prolonged contact use safety glasses
Skin and body protection	: not necessary
Respiratory protection	: not necessary
